OBJECTIVES

- Seeking a dynamic and collaborative workplace that leverages my programming skills, educational background, and strong interpersonal abilities to foster personal and professional growth while making impactful contributions.

WORK EXPERIENCE

Scan Marine, Inc.   *March 2023 – July 2023*
IT Intern – Supervised Industrial Training

- Assisted in creating a comprehensive floor plan for the stockroom and warehouse as part of the implementation of an inventory management system.
- Utilized software tools like AutoCAD to design and draft the floor plan ensuring optimal space utilization and efficient flow of goods.
- Supported the implementation of the inventory management system by providing input on stockroom organization and layout considerations.
- Assisted in the replacement and calibration of malfunctioning components in ICOM radar sensors following manufacturer guidelines and safety protocols.
- Conducted pre-shipment checks on radios to verify that they met quality standards and were in proper working condition.

EDUCATION

Technological University of the Philippines   *August 2019 – August 2023*
Bachelor of Science in Information Systems

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, PHP (currently learning)

Frameworks/Technologies: MongoDB, Express.js, React.js, Node.js

PROJECTS

Capstone Project: *Student Offenses Record Management System| MongoDB, Express.js, React.js, Node.js, Vercel*

- Integrated Data Analytics features for insightful trend analysis and reporting.
- Implemented back-end using Node.js, ensuring efficient data processing and management.
- Established seamless communication between the front-end and back-end.
- Published the application on Vercel.

Personal Project: *GastosKo | MongoDB, Express.js, React.js, Node.js, Vercel*

- Implemented back-end system in Node.js, enabling secure and efficient data handling.
- Established seamless communication between the front-end and back-end, ensuring a cohesive user experience.
- Successfully deployed both the back-end and front-end on Vercel, ensuring accessibility and scalability.
